Can parks be good neighbors, complementing historically valued local livelihoods and helping model coexistence between people and large carnivores?

The New York Times

<https://www.nytimes.com/2018/02/19/world/americas/patagonia-national-park-chile.html>

With 10 Million Acres in Patagonia, a National Park System Is Born

It expands Chile's national parklands by nearly 40 percent, enlarging the area of protection for pumas, condors, flamingos and endangered deer species.

Along the way, unpaved roads wind through looming mountains, flanked by turquoise rivers and the seemingly endless General Carrera Lake. Grasslands dotted with guanacos, a cousin of the camel, give way to sprawling steppes and forests, deep-blue waterways and majestic snow-capped mountains at the doorsteps of breathtaking ice fields.

The Guardian
